

***early Pursuit against
Organized crime using
envirOnmental scanning, the
Law and IntelligenCE systems***

***Developing an efficient and effective environmental
scanning system as part of the early warning system for the
detection of emerging organized crime threats***

ePOOLICE is a European project co-funded by the European Union under its FP7 Programme that aims to find solutions supporting:

- ❖ *the systematic monitoring of the external environment for the detection of “weak signals” of upcoming organised crime threats ,*
- ❖ *the rapid identification and qualification of these threats, typically run by organised crime,*
- ❖ *the discovery of organised crime and underlying criminal organisations as early as possible to prevent further formation of stronger, more resilient criminal systems,*
- ❖ *the assessment of the expected evolution of organised crime threats.*

Improving...

... the process of detecting and selecting new organized crime threats at EU level,

... the effectiveness of the end-users (LEAs, criminological institutes and private businesses),

... the strategic decision makers' ability to counterbalance detected upcoming threats before they materialize,

... the understanding of the technologies and trends, leading to the strategic planning into security issues of all stakeholders,

... to warrant

EU level analysis & EU-wide responses
